Periodic Test- I

Session: 2026 – 27

Social Science

Model Question Paper

Grade: 6

Max Marks: 30

Date:

Duration: 1 Hour

General Instructions

- This Question Paper contains 5 printed pages.
- This Question Paper comprises of sections – A, B, C, D, E
- There are 16 questions in the question paper. All questions are compulsory.
- Write down the Serial Number of the question in the answer sheet before attempting

SECTION A

(9 Marks)
(1× 9=9)

I. Fill in the blanks with the correct option:

1. The angular distance of a place north or south of the Equator is measured in terms of _____.
 - a) Longitude
 - b) Latitude
 - c) Hemisphere
 - d) Grid
2. Which of the following is considered a 'literary source' of history?
 - a) Coins
 - b) Pottery
 - c) Manuscripts
 - d) Tools
3. The Earth's axis is tilted at an angle of _____ to its orbital plane.
 - a) 23.5°
 - b) 66.5°
 - c) 90°
 - d) 0°

4. Riya travels from India to different states and notices that people speak different languages, wear different clothes and celebrate different festivals. What does this show about India?

- a) All Indians follow the same culture.
- b) India is a diverse nation with many cultures and traditions.
- c) Every state in India is exactly the same.
- d) People in India speak only one language.

5. Identify the type of historical source shown in the picture.

- a) Manuscript
- b) Inscription
- c) Monument
- d) Artefact

6. State whether True or False: If false, correct the statement.

The International Date Line is drawn at 90° longitude.

7. Pick the odd one out.

- a) Vedas
- b) Pillar Edict
- c) Ramayana
- d) Mahabharata

8. There are two statements marked as Assertion (A) and Reason (R). Mark your answer as per the options provided:

Assertion (A): The Earth experiences seasons.

Reason (R): The Earth's revolution around the Sun and its tilted axis cause the change in seasons.

- a) A is true and R is the correct explanation of A
- b) A is true but R is not the correct explanation of A
- c) A is true but R is false

- d) Both A and R are false
9. A class teacher shows students a map where imaginary horizontal lines are drawn at equal distances from the Equator towards the poles. A student notices that these lines never intersect each other.
What are these lines called?
- a) Longitudes
b) Meridians
c) Latitudes
d) Time zones

SECTION B

(6 Marks)

II. Very Short Answer Type Questions

(2×3=6)

10. Define the term 'Diversity' in the context of Indian society.
11. a) What is a 'Manuscript'? Where were they usually written in ancient times?

OR

- b) While exploring a cave, historians found drawings of animals on the walls along with tools made of bones and stones. What does this discovery suggest about the lives of early humans? Explain briefly.
12. Why are the areas near the Equator known as the 'Torrid Zone'?

SECTION C

(6 Marks)

III. Short Answer Type Questions:

(3×2= 6)

13. a) How does the study of old coins help historians learn about the past? Give three points.

OR

- b). A historian studies old manuscripts and inscriptions to understand how people lived long ago. What does this show about the sources of history?
14. In what ways does geography influence the culture of people living in a place?

SECTION D

(5 Marks)

IV. Long Answer Type Questions

(5×1=5)

15. a) What makes the Equator different from the Prime Meridian?

OR

- b) Why is it important for large countries like India to follow a single standard time zone.

SECTION E

(4 Marks)

V. Source-based question:

(4x1=4)

16. Manuscripts were usually written on palm leaves or on the specially prepared bark of a tree known as the birch, which grows in the Himalayas. Over the years, many manuscripts were eaten away by insects, some were destroyed, but many have survived, often preserved in temples and monasteries. These books dealt with all kinds of subjects: religious beliefs and practices, the lives of kings, medicine, and science. Besides, there were epics, poems, and plays.

People copied manuscripts by hand because printing technology was not available at that time. Scribes spent many hours carefully writing each page. Today, historians study these manuscripts to understand the culture, beliefs, and daily life of ancient societies.

1. Where did the birch trees grow, and what part of the tree was used for writing? (1M)
2. Mention two factors that led to the destruction of many ancient manuscripts (1M)
3. A museum finds a collection of palm-leaf manuscripts damaged by insects and moisture. Suggest two methods the museum can use to preserve them for future generations. texts (2M)

OR

Archaeology is the study of the past through material remains. Archaeologists dig deep into the earth to find tools, weapons, pots, pans, ornaments, and coins. Some of these objects may be made of stone, others of baked clay, or metal. Objects that are made of hard, imperishable substances usually survive for a long time. These physical remains act as silent witnesses to the lifestyle. Archaeologists also study bones, seeds, cave paintings, and ancient buildings to understand how people lived in earlier times. By carefully examining these remains, they can learn about food habits, occupations, trade, and religious practices of ancient civilizations.

1. Why do certain objects last longer than others according to the passage? (1M)
2. Why are physical remains called “silent witnesses” to history? (1M)
3. A student is studying an ancient site where no written records were found, but tools, cave paintings, and animal bones were discovered. (2M)
 - I. Identify the period to which this site belongs.
 - II. Explain your answer with reference to the information given
