

Session: 2026-2027

PERIODIC TEST - I

GRADE

Subject : ENGLISH

Date: 0/0/2026

TIME: 1 Hour

Max Marks: 30

General Instructions:

- This question Paper contains 3 typed pages.
- This question Paper comprises of 4 sections – A,B,C and D.
- Internal Choices are in section B and D.
- Write down serial Number of the question in the answer sheet before attempting it.

SECTION- A READING (7 MARKS)

I	Read the passage and answer the following questions	1X7=7
1.	Plastic is one of the most widely used materials in the world today. From packaging and toys to furniture and electronics, plastic is everywhere. It was first invented in the early 1900s as a cheap and durable alternative to natural materials like wood, metal, and glass. Over time, its popularity grew because it was lightweight, waterproof, and easy to shape.	
2.	However, the very qualities that make plastic useful also make it harmful to the environment. Most plastics are not biodegradable, meaning they do not break down naturally. Instead, they can remain in the environment for hundreds of years. When plastic waste ends up in oceans and rivers, it can harm marine life. Animals often mistake plastic for food, which can lead to injury or death.	
3.	To address this issue, many countries are now promoting recycling and encouraging the use of biodegradable alternatives. Recycling helps reduce the amount of plastic waste by turning used plastic into new products. Biodegradable plastics, made from natural materials like corn starch, break down more easily and are less harmful to the environment.	
4.	Still, the best solution is to reduce our use of plastic altogether. Simple actions like carrying reusable bags, avoiding single-use bottles, and choosing products with less packaging can make a big difference. Everyone has a role to play in protecting the planet from plastic pollution.	

Based on your understanding of the above passage, answer the following questions given below.		1X7=7
i.	Why did plastic become popular after its invention? A. It was expensive and rare B. It was heavy and strong C. It was lightweight and easy to shape D. It was made from metal	1
ii.	What does “non-biodegradable” mean? A. Breaks down quickly in water B. Can be eaten by animals C. Does not break down naturally D. Is made from plants	1
iii.	How does plastic harm marine animals? A. It makes the water warmer B. It blocks sunlight from reaching them C. They mistake it for food D. It helps them build homes	1
iv.	What is one benefit of recycling plastic? A. It increases plastic production B. It turns plastic into metal C. It reduces plastic waste D. It makes plastic heavier	1
v.	What is the best way to reduce plastic pollution, according to the passage? A. Use more plastic bags B. Burn plastic waste C. Stop using plastic as much as possible D. Throw plastic in rivers	1
vi.	What is one reason plastic is harmful to the environment? A. It is too expensive to produce B. It breaks down too quickly C. It remains in nature for a long time D. It is made from natural materials	1
vii.	What are biodegradable plastics made from? A. Metal and glass B. Corn starch and other natural materials C. Recycled plastic D. Oil and gas	1

Section B: WRITING SKILLS (4 Marks)		
II.	Write the character sketch of anyone of the following 80-90 words:	4X1=4
A.	Cristiano Ronaldo (born February 5, 1985-----Portugal-----grew up in a working-class family----- Portugal's All-Time Top Scorer-----He first played for Clube Desportivo Nacional of Madeira----- social media King---exceptional dribbling skills and speed----- Discipline and dedication)	
OR
